Profile Summary

Motivated Software Engineer graduate (2024/2025) with strong foundations in computer science, algorithms, and system design. Proficient in **Java, Python, C, and R**, with experience in building full-stack applications, REST APIs, and database management. Skilled in **object-oriented programming, debugging, and testing** to ensure high-quality solutions. Adept at collaborating in teams, communicating effectively, and applying engineering principles to solve real-world problems. Enthusiastic about contributing to scalable solutions at Infosys while continuously learning emerging technologies.

Technical skills

- **Programming:** Python, Java, C
- **Web Development:** HTML, CSS, JavaScript, Bootstrap, REST APIs
- **Databases:** MySQL, SQL
- **Version Control & Tools:** Git, GitHub
- **Cloud Platforms:** AWS (Basics), Google Cloud (Basics)
- **Data Analytics:** NumPy, Pandas, Matplotlib, Power BI, Tableau

Soft skills

- Communication
- Creativity
- Active Listening
- Time Management
- Adaptability
- Collaboration
- Problem-Solving
- Leadership

Education

Sree Chaitanya Institute of Technological Sciences
B.Tech - Computer Science and Engineering (CSE)

2021 – 2025
CGPA: 7.5

Projects

Social Media Forensics: Adaptive Cyberbullying Detection

Apr 2025

- Developed a fine-grained cyberbullying and hate speech detection model using Multi-Layer Perceptrons (MLP) combined with Neutrosophic Logic to handle ambiguity and uncertainty in social media data.
- Implemented advanced text preprocessing, SMOTE for class balancing, and one-vs-one classification to achieve up to **97% accuracy**.
- Contributed to scalable social media forensics by improving automated classification of age, gender, ethnicity, and religion-based cyberbullying.

Real-Time Webpage Malware Detection (KAYO)

Nov 2024

- Designed and implemented a **real-time malware detection system** for mobile webpages using **logistic regression** and **11+ mobile-specific features**, achieving **90% detection accuracy**.
- Analyzed over **350,000 labeled webpages**, incorporating lightweight static analysis for scalability and a low **false-positive rate of 8%**.
- Developed a **Java/J2EE** solution with **MySQL, REST APIs**, and **Git-based version control**, deployed on **Tomcat server** for secure, mobile-specific threat detection.

Certifications

- **Data Scientist with Python** - DataCamp **Aug 2023**
- **Python For Everybody** - Coursera **Jun 2023**
- **TCS iON Career Edge** - TCS iON **May 2023**

Achievements / Extracurricular Activities

- Completed **100 Days of Code Challenge**, building projects in **Python, Flask, Git, and APIs**
- Worked as a **Data Analyst Intern** at ConTechHub (2024), automating workflows with **Python, SQL, and Power BI** dashboards
- Guided peers in their career development by providing mentorship, advice, and support to help them achieve their goals.
- Share **awareness and motivational content on LinkedIn 88K+ impressions**, researching real-world tech trends and career topics, achieving strong reach and engagement to help peers stay informed and inspired.
